

YOURS?

Accidental sharing puts you and others at risk of HIV and hepatitis

Protect yourself by:

- always having enough syringes so you can use a new one every time
- preparing your hit in a 'safe space'
- marking syringes you might re-use as yours
- always cleaning syringes you're re-using with bleach

MINE?

The Harm Reduction Works resources are produced by Exchange Supplies for the National Treatment Agency and Department of Health as part of the Reducing Drug Related Harm Action Plan.
