

THIS NEEDLE HAS NEVER BEEN USED

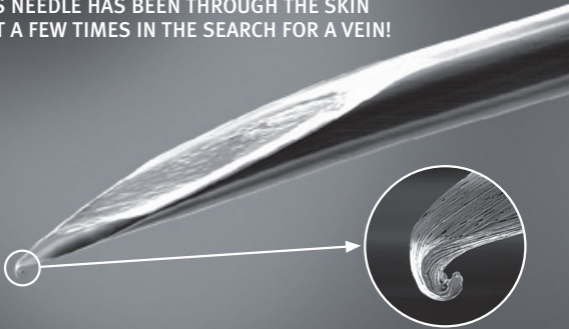

**WHEN A NEEDLE FEELS BLUNT,
THIS IS WHAT IT LOOKS LIKE.
IMAGINE WHAT IT WOULD DO TO YOUR VEINS.**

**YOU'VE ONLY GOT ONE SET OF VEINS.
IF YOU TAKE CARE OF THEM, THEY'LL LAST LONGER.**

**GO SLOW. BE GENTLE.
ROTATE SITES TO LET YOUR VEINS RECOVER.**

NEVER SHARE INJECTING EQUIPMENT.

THIS NEEDLE HAS BEEN THROUGH THE SKIN
JUST A FEW TIMES IN THE SEARCH FOR A VEIN!

Images taken using a scanning electron microscope
at the Department of Medical Microscopy Sciences,
University of Wales College of Medicine, Cardiff.
With thanks to Dr Jan Hobot.
